

SARS has served the Antelope Valley for nearly 30 years providing assistance to sexual assault survivors and their families. However, the Valley Oasis applied for and received the funding to continue services to Sexual Assault victims of the Antelope Valley after the announcement that the current agency would not be applying for the renewal of the grant. Valley Oasis began serving Sexual Assault victims on November 1, 2008.

The trained volunteers and professionals of SARS provide many services, such as the 24-hour crisis hotline, advocates who offer guidance and accompaniment from the Emergency Room/SART Center throughout the legal and judicial process, one-to-one crisis counseling, information and referrals, prevention education and self-defense seminars.
